$\qquad$
(a) Find the current flowing in each of the resistors in the circuit below. For the diodes, use the on/off model. (Do not use the exact diode equation.) (Hint: The current does not divide equally between $R_{l}$ and $R_{2}$.)
$i_{R l}=$ $\qquad$
$i_{R 2}=$ $\qquad$

(b) Find the current flowing in each of the resistors in the circuit below. For the diodes, use the on/off model. (Do not use the exact diode equation.)

$i_{R l}=$ $\qquad$
$i_{R 2}=$ $\qquad$
$i_{R 3}=$ $\qquad$
